

PG&E Talent Connect

Job Posting Title

Telecommunications Technician

Job Posting Date: 01/18/2017

Requisition #: 53973017-E01

Job Category: Maintenance / Construction / Operations

Job Level: 2. Individual Contributor

Company

Based in San Francisco, Pacific Gas and Electric Company, a subsidiary of PG&E Corporation (NYSE:PCG), is one of the largest combined natural gas and electric utilities in the United States. And we deliver some of the nation's cleanest energy to our customers in Northern and Central California. For PG&E, "Together, Building a Better California" is not just a slogan. It's the very core of our mission and the scale by which we measure our success. We know that the nearly 16 million people who do business with our company count on our more than 24,000 employees for far more than the delivery of utility services. They, along with every citizen of the state we call home, also expect PG&E to help improve their quality of life, the economic vitality of their communities, and the prospect for a better future fueled by clean, safe, reliable and affordable energy.

Pacific Gas and Electric Company is an Affirmative Action and Equal Employment Opportunity employer that actively pursues and hires a diverse workforce. All qualified applicants will receive consideration for employment without regard to race, color, national origin, ancestry, sex, age, religion, physical or mental disability status, medical condition, protected veteran status, marital status, pregnancy, sexual orientation, gender, gender identity, gender expression, genetic information or any other factor that is not related to the job.

Department Overview

Information Systems Technology Services is a unified organization comprised of various departments which collaborate effectively in order to deliver high quality technology solutions.

Position Summary

Telecommunications Technicians, without direct supervision, will install, test and maintain telecommunications systems, including but not limited to intercommunication systems, telephone voice over IP systems, PBX, voice and data-switching systems, major operations computers, supervisory, power and telephone line carriers, microwave, SCADA Control systems, fiber optics, multiplex, radio – both voice and data, remote signal and remote control equipment, load frequency control, telemetering equipment, power systems including UPS, DC chargers and large battery banks. Must be able to trouble shoot from basic electronic schematics. Must use and maintain communication circuit prints. May be required to investigate, correct, or make recommendations to

correct user station equipment, personal computers and related equipment problems, as well as radio and television interference complaints. May be required to install protective grounding on power systems.
